-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 27 April 2001.
2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

6) ☐ Other: _____

Claim Objections

1. Claims 23-42 are objected to because of the following informalities:

Regarding claim 23, "the computers" in line 7 should be replaced with "all computers" for consistency with the specification on page 10-line 17.

Regarding claim 27, a typo error "he" in line 1 should be corrected.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-22, 27 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites the limitations "said associated computers", and "said cluster of computers" in line 14. There are insufficient antecedent basis for these limitations in the claim. The same remark applies to claim 7-line 3.

Claim 7 recites the limitations "said transceiver" in lines 4-5. There is insufficient antecedent basis for the limitation in the claim.

Regarding claim 27, it is unclear as to what is the intended claim limitation by reciting "prior to transmitting said received and screened information outside said plurality of computers" in lines 2-3, since in claim 23, an associated computer (among the plurality of computers) is assuming to receive a route information from a first

computer to a plurality of computers, wherein a second processor of the associated computer performs an inbound screen, a comparison step, and performing an outbound screen on the received and screened information, etc.,

Allowable Subject Matter

3. Claims 43-62 are allowed.
4. Claim 1 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
5. Claims 7, and 27 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
6. Claims 2-6, and 8-22 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
7. Claim 23 is objected to but would be allowable if rewritten to overcome the objection set forth as above.
8. Claims 24-26, and 28-42 would be allowable if claim 23 is to overcome its objection as set forth above.

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Salama et al. (US 6,584,093); Foti et al. (US 2002/0227915); Burns et al. (US 2003/0014644); Roy (US 2004/0223488); Gallant (US 2002/0137490) are cited to show system and method for assisting in controlling real-time transport protocol flow through multiple networks via use of a cluster of session routers, which is considered pertinent to the claimed invention.
